

Bunker Repair

There are 37 greenside bunkers and 35 fairway bunkers on our golf course. Almost all need sand added and compacted then raked. We estimate roughly 400 tons of sand are needed.

Some bunkers require more extensive repair and some that are holding water need drainage repair as well.

We would concentrate on the green side bunkers first then fairway bunkers in the order of worst condition (like holes 11 & 14) to better condition.

Fairway trap on #11

Fairway trap on #14

The bunker project will need to be carried out by a contractor and can be completed in 2-3 weeks.

Projected Expenses

Mobilization Fee for Equipment	\$2500	
Labor to haul, spread, compact & rake sand	\$8000	
Bunker Sand - 400 ton cost	\$19,660	price of sand can fluctuate due to fuel cost
Drainage work - materials and labor	\$2000	
Total	\$32,160
