

Hole #14 Repairs

Hole #14 is in need of some TLC. At the fairway cross bunkers, sod is needed on both sides, (roughly 7 pallets for both sides).

Some trees need to be removed, 5 on the left and one at the last fairway trap on the right, it stays full of debris and the shade causes grass problems. Some trees on each side also need limbing up.

There is some cart path work that needs to be done also between the fairway traps and the green and more sod placed on each side of the cart path, roughly 4 pallets.

2 additional pallets needed at last fairway trap on the right.

Bare area left side of #14 at the fairway traps.

Bare area to the right of the fairway traps.

Cart path on #14 that needs repair.

Fairway bunker on #14 on the right near the green, needs tree removed to keep it clean and allow for bermudagrass survivability.

Projected Expenses

Tree Removal	\$2400
Tree Limbing	\$1200
Stump Grinding	\$900
Cart Path Repair	\$3000
Bermudagrass prep and lay (13 pallets)	\$3200
Total	\$10,700
